

Linking Welfare and Work

The relationship between work and welfare is a major policy issue that has to be resolved in a way that meets the needs of individuals, the market and society as a whole. This relationship and its complexities forms the subject of a series of papers commissioned by the European Foundation for the Improvement of Living and Working Conditions and presented in the publication *Linking Welfare and Work*. The full text of the contributions can be read or downloaded from the Foundation Web site at [http://www.eurofound.ie/.../...](http://www.eurofound.ie/.../)
